THE PROBLEM

Retail Investors Are Flying Blind

A Market Full of Data, Starved of Intelligence

India's retail investors face a broken information ecosystem at every turn.

Information Overload

100+ news articles daily, but less than 10% are actually relevant to your portfolio

Signal vs. Noise

Insider trades, filings, and breakout patterns are missed ~80% of the time

No Personalization

News and insights are NOT portfolio-aware — generic for everyone, useful for no one

Missed Opportunities

Delayed reactions = lost profits. No integrated tool for tax, FIRE, or money health

Investors don't lack data. They lack intelligence.
